About Us

SynchronEng Pvt. Ltd. established in 2023 and we are based in Pune, India. SynchronEng Pvt. Ltd. is a multi-domain engineering and solutions company. Our goal is clear to provide solutions that are practical, locally aligned, and scalable, particularly for projects in regulated and infrastructure-driven sectors. SynchronEng provides engineering and design hubs offering engineering design services across the fields of mechanical, electrical, automotive, and electronics.

We help with manufacturing and localization, and manage projects from start to finish. We also support trading, import and export, We also work in renewable energy and solar solutions, digital, IT and enterprise systems. Our team can assist with graphics, digital design, technical communication, and financials, compliances, and statutory services to keep your operations running smoothly. Synchron Engineering is already actively working in Saudi Arabia and has successfully delivered many large- and small-scale projects. Constant delivery, quality workmanship, and punctuality have helped us to build our reputation as a reliable and trustworthy company. We are also proud to support the Saudi Vision 2030, and we will continue to contribute to its goals by developing infrastructure sustainably and by localizing it.

We have a team of experts who work as a strategic partner for our clients. SynchronEng Pvt. Ltd works with clients across India and the GCC region. Many of our partners approach us for manufacturing localization, supply-chain support, and smooth project execution.

With strong industry experience and the use of modern tools, we help businesses meet regulatory needs and simplify complex processes.

At SynchronEng, we believe good results come from teamwork, and that is why we spend time understanding our clients' needs before proposing solutions. Our approach is to deliver reliable, and focused solutions which helps us deliver work that is unique and useful over the long term.

So, come and join us as we synchronize your business for long-term success.

Our Vision & Mission

Vision

We are focused on coming up with efficient and dependable engineering solutions using innovation, technical skills and teamwork. We strive to become a trusted partner, and we would help our partners reach their localization goals and develop sustainably.

Mission

We aim to assist businesses by providing practical engineering solutions that can be useful in real-life situations. Through the provision of quality engineering, manufacturing support, localization, and project management services. SynchronEng, will assist the clients to plan, develop and execute the project seamlessly.

SynchronEng is already actively working in Saudi Arabia and GCC Region and has successfully delivered many large- and small-scale projects. We are also proud to support the Saudi Vision 2030, and we will continue to contribute to its goals by developing infrastructure sustainably and by localizing it.

OUR CORE VALUES

Engineering Quality

We maintain high standards in every engineering solution we deliver. Our focus is on accuracy, safety, and long-term performance. Quality is the foundation of our work.

Focused Localization

We support local manufacturing and supplier development based on regional requirements. Our approach helps clients meet localization goals while maintaining efficiency and compliance.

Integrity and Compliance

We operate with honesty and transparency in all our business activities. Every project follows regulatory standards and industry compliance requirements.

Innovation and Adaptability

We stay updated with modern engineering practices and technology. Our team adapts quickly to changing project demands and market conditions.

Structured Execution

We operate with honesty and transparency in all our business activities. Every project follows regulatory standards and industry compliance requirements.

OUR CORE VALUES

Cost Effectiveness

We provide engineering solutions that balance quality and cost. Our goal is to deliver maximum value without compromising performance.

Client Alignment

We work closely with our clients to understand their objectives. Our solutions are aligned with their operational needs and long-term goals.

Reliability

We consistently deliver dependable engineering and project solutions. Clients trust us to meet commitments and maintain performance standards across projects.

Business Activities & Services

Engineering and Design

We provide technical planning and engineering design services for infrastructure and industrial projects. Our solutions are practical, scalable, and aligned with regulatory standards

Manufacturing and Localization

We assist in setting up local production and supplier networks. Our manufacturing support ensures compliance with regional localization requirements.

Project Execution

We manage projects from start to finish with structured coordination. Our focus is on efficiency, quality control, and timely delivery.

Trading and Import–Export

We support domestic and international trade operations. Our team ensures smooth procurement, documentation, and regulatory compliance.

Renewable Energy Solutions

We provide support for solar and renewable energy projects. Our services include system integration and infrastructure support for clean energy initiatives.

Digital and IT Services

We offer enterprise system support and digital solutions. These services improve operational efficiency and data management.

Graphics Designing

Creative design solutions for branding, marketing materials, and digital communication. We prepare technical documentation, graphics, and product communication materials. Clear documentation helps with approvals, compliance, and project clarity

Financial and Compliance Services

We assist with statutory, financial, and regulatory requirements. Our structured approach ensures smooth operational and legal compliance.

SOLUTIONS & INDUSTRIES SERVED

Utilities & Power Distribution

We support utility companies with reliable electrical infrastructure solutions. Our services are aligned with regulatory and safety standards.

Renewable Energy

We work with solar and clean energy developers. Our engineering solutions support sustainable energy projects

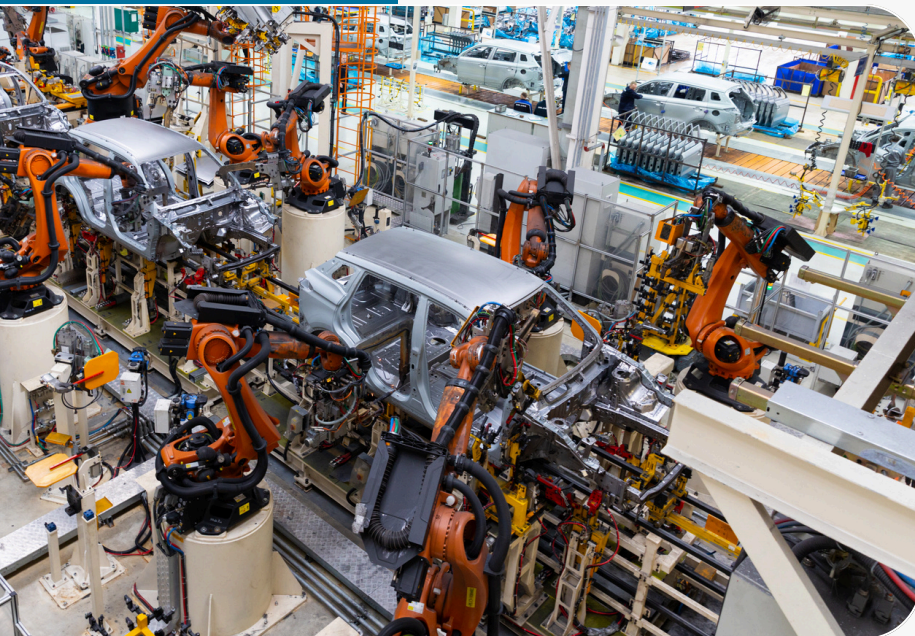

Oil & Gas

We deliver engineered electrical solutions for the oil and gas sector. Our systems meet strict safety, compliance standards.

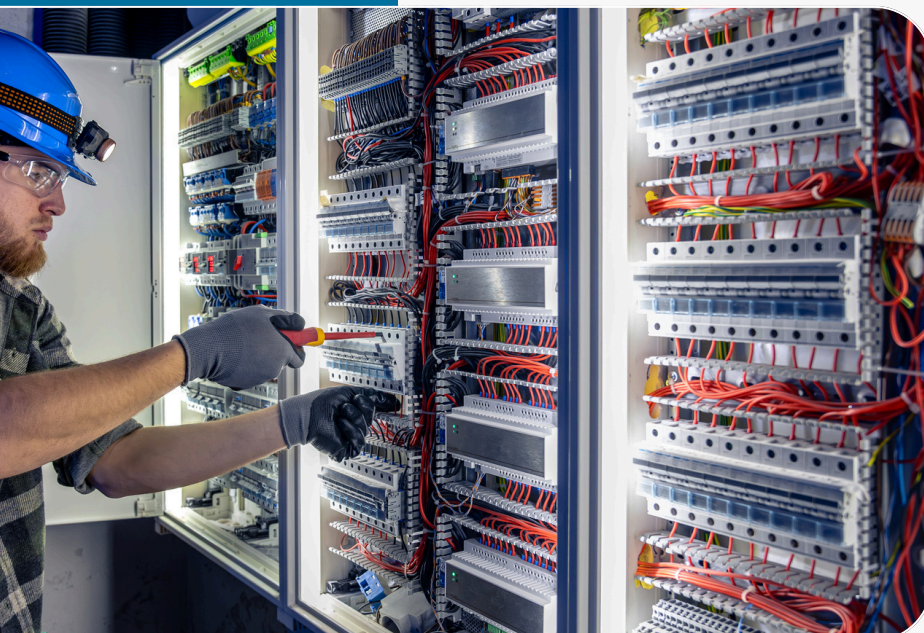

Infrastructure & Construction

We support large-scale infrastructure and construction projects. Our solutions enhance operational efficiency and project reliability.

Industrial Manufacturing

We assist manufacturing industries with engineering and fabrication solutions. Our services improve production efficiency and operation

Electrical Panels & Enclosures

We design and supply electrical panels, switchboards, and enclosures. These systems are built for industrial and utility applications.

Smart Meter Boxes & Feeder Pillars

We offer metering and outdoor distribution solutions for power networks. Our products support efficient energy management and infrastructure development.

Fiber Optic Junction Boxes (FOJB)

We supply fiber optic enclosures for telecom and data networks. These solutions protect and organize fiber infrastructure.

Sheet Metal Fabrication

We manufacture precision-fabricated sheet metal components. Our products support electrical, industrial, and infrastructure applications.
